

PRECISION **ADVANCE** the cell & gene therapy collective™

PRECISION
for medicine

PROJECT FARMA

PRECISION
value & health

Propelling Your CGTx Innovation to the Next Stage

Delivering a cell or gene therapy to market requires a nuanced, comprehensive and integrated approach, scientific and manufacturing expertise, and the right partner.

PRECISION ADVANCE, a collection of interconnected services and complementary teams uniquely focuses on the complexities of clinical, regulatory, manufacturing, and commercial needs to successfully bring cell or gene therapies to market.

Novel Expertise

ACCELERATE RESEARCH & CLINICAL DEVELOPMENT

A Global Leader in Cell and Gene Therapy Research & Clinical Development

OPTIMIZE NEXT-GEN MANUFACTURING

Pioneering Manufacturing for Advanced Therapies

DRIVE COMMERCIAL SUCCESS

A Pacesetter in Commercialization Strategies & Market Access

50+

research and clinical development projects supported in the last two years

40+

facility builds and capital expansions with \$4B+ in investment over the past four years

70%+

of approved cell and gene therapies commercially launched

PRECISION
for medicine

PROJECT FARMA
A PRECISION FOR MEDICINE COMPANY

PRECISION

Interconnected Services

ACCELERATE RESEARCH & CLINICAL DEVELOPMENT

Clinical Trials

- Cell and Gene Therapy Study Experience
- Trial Design and Execution
- Global Sample Processing and Logistics
- Regulatory Strategy and Filings

Specialty Lab Services

- Cell Therapy Lab Capabilities
- Gene Therapy Lab Capabilities

Companion Diagnostic Services

- Cdx Development
- Cdx Regulatory
- Cdx Commercial Strategy

Biomarker & Translational Intelligence

- Centralizing PK, Clinical, and Exploratory Data

OPTIMIZE NEXT-GEN MANUFACTURING

Technical Operations Strategy

- Due Diligence, Pipeline Evaluation and Mobilization
- Make Vs. Buy Business Case Analysis and Execution
- Gmp Infrastructure Startup and Support
- Program Management
- Business Infrastructure

Manufacturing Execution

- Capital Projects, Facility Builds, Tech Transfers
- Engineering, Automation and Serialization, Track and Trace
- Validation
- Quality, Regulatory, and Compliance
- Reliability, Maintenance, and Asset Management

DRIVE COMMERCIAL SUCCESS

Evidence Solutions & Value Demonstration

- Burden of Illness, Treatment Patterns, Cost of Care
- Network Meta-analysis and Indirect Treatment Comparisons
- Health Economic Models
- HTA Engagement and Real-World Evidence

Pricing & Access Strategy

- Market Access Strategy
- Patient Access Schemes and Innovative Payment Models
- Distribution Strategies

Engagement Solutions

- Scientific Communications
- Patient, Payer, Provider Engagement
- Brand Strategy and Promotion

Your Experts

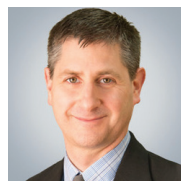

Delivering a cell or gene therapy to market requires a nuanced, comprehensive and integrated approach and the right partner.
